FINDINGS AND CONCLUSIONS

Based on the testimony and evidence presented at the hearing the variance is granted.

Facts which support the request for relief from the strict terms of the Ordinance, in this case, a variance for a reduction of a rear yard setback from 50 feet to 15 feet 5 inches for an addition are as follows:

The addition is located on an existing concrete pad to the rear of the church. There is adequate screening between the church and Mr. Biss’s property. Mr. Biss objected to the addition because of the effect it might have on his well and septic. The addition is being located on an existing pad and is not creating an increase in the amount of storm water runoff which will run away from his property. Mr. Biss was also concerned about plant life on his property. Being as there is no change to the amount of imperious surface, the addition will not affect plant life.

The applicant does need to apply for a building permit and comply with all building codes and other ordinances that apply. The applicant has fifteen (15) days to apply for a building permit. If no permit is applied for within the fifteen (15) days, this approval becomes null and void. Mr. Biss was the only neighbor present at the hearing in opposition of the variance and his concerns were taken into consideration in granting this variance. Being as no other neighbors were present at the hearing opposing the variance, the granting of this variance should have no adverse effect on any adjoining property owners.
This approval is valid for one year from the date of this decision.
