LOCATION:

APPLICABLE REGULATIONS:

FINDINGS & CONCLUSIONS
Based on the testimony and evidence presented at the hearing, the variance is granted.

A variance is being requested from the required minimum setback of 50 Ft. to allow a 20 Ft. building setback from a public road. Phase I consists of an existing 3-story office building constructed in 1980 within a 4 acre parcel. The Phase II development will consist of a one-story, 20,000 Ft. office building on the undeveloped 2 acres. In the mid 80's, a right in/right out curb cut was constructed from the State Highway Rt. 97 for future development. In order to utilize the existing curb cut, which would increase accessibility and ease circulation of traffic into the development, a variance is necessary to build the proposed building to the north. Without this second curb cut, there is insufficient access to the site, which borders a public road; thus, creating undue hardship and practical difficulty for the Applicant. On that basis, the variance request is hereby granted.

The Bureaus of Economic Development and Development Review are in agreement with this variance request.

There were no neighbors present at the hearing opposing the applicant's request; therefore, the granting of this variance should have no adverse effect on any adjoining property owners.

This approval is valid for one year from the date of a Zoning Certificate.
NOTE:
